Figure 1 is a schematic diagram of a computer screen displaying an alarm notification interface. The screen is divided into several sections. At the top, a title bar reads "Alarm notification from Ronald Smith, Troy". Below this, the screen is organized into four main panels.

The top-left panel, labeled "Client data", contains fields for Name (Smith, Ronald), Address line 1 (McDonald 12), Address line 2 (110 8th street), City (Troy), State (AAA), Zip code (BBBB), and Phone ((518)276-XXXX). Below these fields is an "Instructions" box stating: "If an alarm is triggered, please notify Mr. Smith @ (516)826-YYYY".

The top-right panel, labeled "Audio/ Video data", shows a video feed of a room with a desk, chair, and shelves. Below the video feed are playback controls: a play button, a pause button, a stop button, and buttons for previous frame, previous 10 seconds, next 10 seconds, and next frame.

The bottom-left panel, labeled "Actions", contains a list of actions: "17:34 Alarm triggered by movement detector", "17:34 Client has been notified on mobile phone #(079)723 ZZZZ", and "17:34 Client answered call". Below the list are four buttons: "Ignore", "Call client", "Call police (man.)", and "Call police (autom.)".

The bottom-right panel, labeled "Notes", contains a text area for notes and two buttons: "Save" and "Reset".
